

The image displays the chemical structure of Vitamin D2 (Ergocalciferol) in white lines on a black background. The structure is a complex polycyclic molecule consisting of a cyclohexene ring fused to a five-membered ring, which is further fused to a six-membered ring, and finally to a five-membered ring. The side chain of the last ring is a branched alkyl chain. Stereochemistry is indicated with wedges and dashes. The text "VITAMIN D2" is written in large, bold, white capital letters across the bottom right of the black area.

# VegNutro-Sol VITAMIN-D2

VegNutro-Sol (Vitamin-D2) is in powder form containing 4000IU per gram D2 activity. It has good bioavailability thanks to its naturally encapsulated form. It is inside the dried vegetable cells to bypasses the degrading digestive system of the body. Eventually during the passage through intestine proteolytic enzymes rupture the cell wall to make the vitamin available.

## Advantages of VegNutro-Sol (Vitamin-D2)

- ◆ VegNutro-Sol is a group of fat-soluble Secosteroid which is one of the essential vitamins.
- ◆ VegNutro-Sol is an essential nutrient for bones and muscle function.
- ◆ It helps in building strong immune system which helps to protect against some cancer, respiratory diseases in children and cardiovascular diseases.
- ◆ It helps your body to absorb calcium used to treat Hypoparathyroidism.
